

Harris & Associates

K-12

Harris & Associates empowers K-12 school districts to create exceptional 21st century learning environments for students and teachers.

Because no two districts are the same—in goals, needs, or resources—we tailor our services accordingly to adapt to each district's unique situation. We represent the District during every phase of a long-term, multi-site bond program, from providing program management to supplementing District staff, our services can be tailored to your needs and budget.

In addition to exemplary program, construction management, and environmental compliance services, our K-12 clients also depend on us to provide:

- Services to assist with meeting DSA readiness requirements,
- Guidance on meeting Collaborative for High Performance Schools (CHPS) Standards for high-performing, 21st century learning requirements, and
- Direction on making facilities operationally sustainable

A Multidisciplinary Approach

Harris has extensive experience supporting school districts across California with program, construction, and project management, as well as other vital services. For example, we helped the San Diego Unified School District implement bond programs for expansion and modernization projects across 200 facilities.

Meanwhile, our work for the Culver City Unified School District involved significant upgrades to aging HVAC and electrical systems, campus security measures, and learning environments.

San Diego Unified School District
Propositions S and Z Bond Program

Classrooms and More

We lay the foundation for brighter futures by delivering environments that support student achievement in STEM and STEAM education, digital literacy, critical thinking, collaboration, and problem solving. Our team has managed numerous large-scale, multi-site building programs with local school board accountability for distinct learning spaces, including:

- Technology-rich, flexible classrooms
- Sports facilities
- “Maker spaces” and innovation labs
- Auditoriums and theaters

We assist with quality analysis and control, constructability reviews, and large-scale environmental and permitting compliance in preparing projects to be DSA ready and meet CHPS guidelines for high performance schools. Above all, Harris works to make schools safe, accessible, and ready to serve students far into the future.

San Diego Unified School District Propositions S and Z Bond Program San Diego Unified School District San Diego, CA

Harris is providing program management and construction staff augmentation support services related to the implementation of San Diego Unified School District's Proposition S and Proposition Z Bond programs. The \$4.9B construction program encompasses more than 200 facilities.

Culver City Unified School District Measure CC Bond Program Culver City Unified School District Culver City, CA

Harris is providing program management services for the District's Measure CC Bond Program. This includes developing an overall program strategy with regard to phases, construction schedules, timing, budget, prequalification, construction manager procurement, contractor procurement, construction material, building systems and equipment.
